DETAILED ACTION

Allowable Subject Matter

Claims 9-15 and 17-30 are allowed.

The following is an examiner's statement of reasons for allowance: The closest art known to the Examiner is cited on the previously submitted PTO 892 form. None of the references or combinations thereof disclose or suggest forming a barrier on the substrate between the standoff and the array of lenses; and attaching a cover to the standoff using an adhesive top surface of the standoff, wherein the barrier blocks the adhesive from extending on the array of lenses as required by Claim 9 and its dependent Claims. Moreover, the cited prior art does not disclose or suggest attaching a cover to the standoff; and cutting the cover while the cover is attached to the standoff, wherein cutting the cover removes a portion of the cover that overlies active circuitry in the substrate and leaves an underlying portion of the substrate intact as required by Claim 12 and its dependent claims. Claims 17 and its dependent claims are allowable for reasons as stated in the previous Office action. Furthermore, Claims 27 and its dependent claims are allowable over the cited prior art as there is no disclosure or suggestion of forming a channel including one or more turns; and attaching a cover to the standoff, wherein attaching the cover leaves the vent and the channel open to permit gas flow to a gap between the cover and the array of lenses, the gas flow preventing external pressure changes from distorting the cover. Therefore, the present Claims are allowable over the cited prior art.
